11/11/2006

This list is based on a list originally authored by Bruce Scodova. There may be other similar lists but I am not aware of them. I have added the NGC designation, object type, constellation and Sky Atlas 2000 map number. Added also is eyepiece f/l and magnification. These items in particular will be useful if the results of the marathon will be used for the Messier Award of the Astronomical League.
